

LEMON SHARK

Negaprion brevirostris

- Lemon sharks are only considered mature at 11 - 12 years old and live to reach a maximum age of 37 years old
- Lemon sharks are targeted by fishermen for their meat and fins
- Lemon sharks can be found in the Eastern Pacific along the coast from the Gulf of California to Ecuador and in the Western Atlantic from New Jersey to Brazil

FUN FACT: Lemon sharks are one of the best studied sharks, specifically in the Bahamas where the Bimini Shark Lab has studied several generations!
